Choose the type of breaches to display:
Click or unclick the boxes then select go.

- **Unintended disclosure (DISC)** - Sensitive information posted publicly on a website, mishandled or sent to the wrong party via email, fax or mail.
- **Hacking or malware (HACK)** - Electronic entry by an outside party, malware and spyware.
- **Payment Card Fraud (CARD)** - Fraud involving debit and credit cards that is not accomplished via hacking. For example, skimming devices at point-of-service terminals.
- **Insider (INSD)** - Someone with legitimate access intentionally breaches information - such as an employee or contractor.
- **Physical loss (PHYS)** - Lost, discarded or stolen non-electronic records, such as paper documents
- **Portable device (PORT)** - Lost, discarded or stolen laptop, PDA, smartphone, portable memory device, CD, hard drive, data tape, etc
- **Stationary device (STAT)** - Lost, discarded or stolen stationary electronic device such as a computer or server not designed for mobility.
- **Unknown or other (UNKN)**

Select organization type(s):  
- **BSO** - Businesses - Other
- **BSF** - Businesses - Financial and Insurance Services

February 25, 2013  
Capella University  
Minneapolis, Minnesota

A collection department employee sent sensitive information to a personal email account. The incident was discovered on January 28 and the employee was fired. A small group of learners may have had their names, Social Security numbers, and other information that was kept by Capella's collection department exposed.

records from this breach used in our total: 0

February 21, 2013  
Polk County School District  
Bartow, Florida

Students who paid tuition for education programs may have had their 1098T tax forms sent to the incorrect address. Between 150 and 200 people out of 2,000 were sent to the wrong address because a group of the tax forms were placed in envelopes without being properly separated. Some people received the forms of several people while others never got their tax forms. The district implemented a new step of sampling some of the envelopes in order to review the process before completing an entire batch.

records from this breach used in our total: 200

February 13, 2013  
University of North Carolina  
Chapel Hill, North Carolina

A cyber attack on two servers resulted in the exposure of employee information. The servers were at the UNC Lineberger Comprehensive Cancer Center. Employees, contractors, and visiting lecturers at the Lineberger Center may have had their Social Security numbers or passport numbers exposed. The breach was discovered in May of 2012 and notifications were sent in December of 2012. Fewer than 15 people who were subjects in research studies were also affected by the breach.

records from this breach used in our total: 3,500

February 1, 2013  
Antioch Unified School District  
Antioch, California

A document with sensitive Worker's Compensation claim information was accidentally sent out with an email to a limited number of Antioch Unified School District employees. Social Security numbers and other information related to current and former employees that reported injuries were exposed. The incident occurred on January 18 and people who received the email were instructed to remove and destroy any saved information contain in the email. Those who received the email were also instructed to provide written verification that they had removed and destroyed the information.

January 24, 2013  
Eastern Illinois University  
Charleston, Illinois

http://www.privacyrights.org/data-breach/new
At least 65 students received information about the grade point average of 430 students during early January 2013. The breach occurred when a spreadsheet that contained the information and the E-number of 430 students was accidentally made available online.

**January 10, 2013**
**KTSU Texas Southern University**
**Houston, Texas**

Texas Southern University's radio station KTSU gave a volunteer position to a person with a criminal history of credit card fraud. The volunteer was later arrested for allegedly using the radio station's donation drive to steal credit card information. The dishonest volunteer faces up to 300 counts of credit card fraud for attempting to misuse the information on donor pledge sheets.

---

**January 8, 2013**
**Charlotte-Mecklenburg Schools**
**Charlotte, North Carolina**

An employee working in human resources was robbed while transporting information between school districts. The employee stopped for lunch and discovered that personnel files containing names, Social Security numbers, addresses, dates of birth, and driver's license numbers had been stolen from their car.

**Information**
**Source:** Databreaches.net

---

**December 21, 2012**
**Fairfax High School**
**Fairfax, Virginia**

Fairfax County Public Schools discovered that student names, ID numbers, grades, and other information were posted online. Students enrolled in 9th, 10th, and 11th grade were affected. The information may have only been available for a day before Fairfax County Public Schools began the process of removing it from online.

**December 18, 2012**
**Western University of Health Sciences**
**Pomona, California**

Western University of Health Sciences' BanWeb Self-Service Federal Work Study reports were accessible to people who used BanWeb with a Western University of Health Sciences user ID and password. The reports contained names, Social Security numbers, and direct deposit bank account information in some cases. The information was available for an unspecified amount of time. Western University of Health Sciences conducted an investigation and reported that there was no reason to believe sensitive information was accessed by unauthorized BanWeb users. Western University of Health Sciences disabled access to the reports after learning about the breach on
November 14. Notifications were sent on December 18.

December 12, 2012
Mt. Diablo Unified School District
Concord, California

EDU STAT Unknown

A December 1 office burglary resulted in the theft of an unencrypted computer. The computer contained files that included current and former Mt. Diablo Unified School District employee names, Social Security numbers, dates of birth, and addresses. People who were employees between 1998 and 2010 may have been affected.

Information
Source: California Attorney General

December 11, 2012
Pepperdine University
Malibu, California

EDU PORT 8,300

A University laptop was stolen from an employee's locked car. Pepperdine learned of the theft on November 12, 2012. The laptop may have contained names, Social Security numbers, addresses, and/or dates of birth.

UPDATE (12/11/2012): As many as 8,300 people may have been affected. The laptop had been used for work related to the IRS and contained data from as far back as 2008. About 75 percent of the people affected were students.

Information
Source: California Attorney General

November 22, 2012
Scripps College
Anaheim, California

EDU PHYS 940 (No SSNs or financial information reported)

Scripps College is located in Claremont, California and the theft took place in Anaheim, California.

Sensitive records were stolen from a tote bag in a staff member's vehicle on the night of November 18. The records included names, dates of birth, cell phone numbers, email addresses, and emergency contact information.

Information
Source: Databreaches.net

November 2, 2012
Cornell University
Ithaca, New York

EDU DISC 2,000

Names and Social Security numbers of people associated with Cornell were publicly available for five days. The information was on a computer in Cornell's athletics department and was accidentally placed online from September 5, 2012 until September 10, 2012.
October 19, 2012 The College of St. Scholastica
Duluth, Minnesota

Hackers were able to guess the answers to student account challenge questions. The email account passwords of at least 28 students were reset and their account information was most likely accessed. The hackers may have been based in Beijing and most likely gathered the information needed to pass the challenge questions from information on the students' Facebook pages.

Information
Source: Databreaches.net

October 16, 2012 University of Georgia (UGA)
Athens, Georgia

The passwords of two University of Georgia (UGA) IT employees were reset and misused by an intruder. Names, Social Security numbers, and other sensitive data of current and former school employees may have been exposed. The breach may have begun as early as September 28, 2012.

Information
Source: Media

October 15, 2012 District 202, Plainfield School District
Plainfield, Illinois

People who applied online at www.applitrack.com for a job in District 202 may have had their information accessed by a hacker. The hacker sent messages to former and current job applicants and informed them that the Plainfield School District 202 website was breached.

UPDATE (10/19/2012): A 14-year-old Joliet West High School student was removed from class and taken to a juvenile detention center for his alleged involvement in the breach.

Information
Source: Databreaches.net

October 10, 2012 Northwest Florida State College
Niceville, Florida

An internal review revealed a hack of Northwest College servers. One or more hackers accessed at least one folder in the server between May 21, 2012 and September 24, 2012. Over 3,000 employees, 76,000 Northwest College student records, and 200,000 students eligible for Bright Future scholarships in 2005-06 and 2006-07 were affected. Bright Future scholarship data included names, Social Security numbers, dates of birth, ethnicity, and genders. Current and former employees that have used direct deposit anytime since 2002 may have had some information exposed. At least 50 employees had enough information in the folder to be at risk for identity theft.

October 8, 2012 Ohio State University, Harvard University, Stanford University, Cornell University, Princeton University, John Hopkins University, University of Michigan, University of Wisconsin, University of Houston, New York University, University of Maryland

http://www.privacyrights.org/data-breach/new
There is no specific location for this breach.

The University of Texas, University of Colorado, University of Pennsylvania, Duke University, Rutgers University, University of Pittsburgh, University of Florida, Case Western Reserve University, Texas A&M University, Boston University, Purdue University, University of Arizona, Arizona State University, University of Utah, Ohio State College of Dentistry, and additional universities were affected. Universities outside of the United States were also affected.

Each affected university is listed here:http://pastebin.com/AQWhu8Ek: http://pastebin.com/AQWhu8Ek

A hacking group called Team GhostShell targeted universities around the world. A total of 53 universities were affected. Most of the data exposed was publicly available, but student, staff, and faculty usernames and passwords were also exposed. It is unclear if any financial information or Social Security numbers were taken from universities.

Information
Source: Databreaches.net

October 4, 2012 Monterey Institute of International Studies, Middlebury College
Monterey, California
EDU PORT Unknown

A September 14, 2012 home burglary resulted in the theft of a laptop. The laptop was password-protected and was stolen along with other items. Student names and Social Security numbers were on the laptop.

Information
Source: California Attorney General

October 1, 2012 San Mateo Union High School District
San Mateo, California
EDU HACK Unknown

Hackers accessed San Mateo Union High School District's computer system and attempted to use it to infiltrate FBI and CIA electronic systems. The District became aware of the problem when United States Naval Intelligence informed them that the District's servers had been compromised. The hackers appear to have used additional organizations in their scheme.

Information

September 28, 2012 University of Chicago
Chicago, Illinois
EDU DISC 9,100

A postcard mailed to University of Chicago employees contained their Social Security numbers. The cards were mailed on September 24 to remind employees about open enrollment, but also had Social Security numbers printed on the outside.

Information
Source: Databreaches.net

September 14, 2012 Lucille Hendricks Elementary School
McAllen, Texas
EDU PHYS 20

A local news team was contacted when a concerned citizen noticed folders with student information in a dumpster. Former student names, Social Security numbers, dates of birth, addresses, and phone numbers were exposed. McAllen School District launched an investigation. The news team held the folders and decided to forward them to the Texas Attorney General's office.

A group of volunteers discovered school materials inside of a public dumpster. There were folders containing sensitive student records among textbooks, novels, and workbooks. The folders contained student Social Security numbers, health records, grade reports, and student education forms. An administrative error meant that custodians discarded obsolete materials that had been stored. The items should have been delivered to the district's central warehouse or sold to used-book dealers. The items were recovered and transmitted to the correct locations.

http://www.privacyrights.org/data-breach/new
A hacker was able to access SJSU's Associated Students information. Associated Students is a student-run non-profit that manages and hosts many SJSU campus services, but it's IT infrastructure is separate from SJSU's. The hacker claimed to have 10,000 student Social Security numbers and driver's license numbers, but it is unclear if this information was actually exposed. The hacker claimed to use an SQL injection to access the information. In addition to Social Security numbers and driver's license numbers, information such as administrative materials, job applications, work schedules, email addresses and passwords from the past 10 years may have been accessed. SJSU denies that information this sensitive was accessed.

Information

July 2, 2012 University of Florida Gainesville, Florida

The University of Florida maintains a page with their privacy breach incidents here: http://privacy.ufl.edu/

The information of former students and applicants was available online. Former students and applicants who signed up for a roommate service online through Levin College of Law in the early 2000s had their Social Security numbers exposed. The breach was discovered in May of 2012; the College of Law stopped using the software for the roommate service in the mid-2000s. Former students and applicants were mailed notifications on June 25.

Information

June 29, 2012 University of Southern California (USC) Los Angeles, California

A breach in a third-party software system used to process credit card transactions in some USC dining halls, including Ronald Tutor Campus Center, Seeds, the Lab on Figueroa St., and Starbucks on the Health Sciences Campus resulted in the exposure of credit card numbers. The breach of USC Hospitality most likely occurred from May 21 to June 21, but may have occurred earlier. Names and contact information were not associated with the credit card numbers.

Information
Source: California Attorney General

June 11, 2012 University of North Florida (UNF) Jacksonville, Florida

UNF Housing has set up a webpage to distribute information about the breach. It can be found here: http://www.unf.edu/housing/.

UNF became aware of a server breach that exposed Social Security numbers and other sensitive information. Students who submitted housing contracts between 1997 and spring 2011 may have had their information exposed. Multiple servers were affected and secured upon discovery. The information may have been accessed as early as spring of 2011.

Information
Source: Databreaches.net

An unauthorized person accessed confidential files that contained current and former students' personal information. Names, Social Security numbers, Dates of birth, student ID numbers, phone numbers, students' free or reduced-price school lunch status, and addresses may have been exposed. Eugene School District 4J's notification can be read here: http://www.4j.lane.edu/communications/story/2012/06/11/securitybreachinformation
UPDATE (07/12/2012): A minor was arrested for possible involvement in the breach. It appears that the teenager may have obtained the login credentials of an employee and used them to access the computer system. Records for approximately 16,000 current students, as well as free and reduced-price lunch records from 2007 were exposed.

UPDATE (08/25/2012): The student was released from custody and expelled by North Eugene High School. He also posted hundreds of students' confidential information on a computer account to taunt district officials. He is on house arrest and his attorney entered not guilty pleas.

Between 300 and 350 transcripts from Summer Language Institute applicants were accessible through the University of Virginia website. The human error was discovered when a student searched Google for an image of himself. Students who applied to the University's program within the last two years may have had their names, transcript information, and Social Security numbers exposed. Technology experts at the University blocked public access to the information and asked Google to remove its cache of the sensitive pages on June 5, 2012. It is unclear how long the information was available.

The University of Nebraska set up a webpage for more information on the breach: http://nebraska.edu/security

A University technical staff member discovered a breach on May 23. Staff took steps to limit the breach and there was no clear evidence that any information was downloaded. The Social Security numbers, addresses, grades, transcripts, housing and financial aid information for current and former University of Nebraska students may have been accessed. The database also included the information of people who applied to the University of Nebraska, but may have not been admitted, and alumni information as far back as Spring of 1985. The University of Nebraska was still investigating the extent of the breach as of May 25, 2012.

UPDATE (05/29/2012): The University of Nebraska created a webpage (http://nebraska.edu/security) for information about the breach. Close to 21,000 people had bank account information that was linked to the student information system and exposed. The University of Nebraska's computer database also held 654,000 Social Security numbers, though it is unclear if that number completely overlaps the number of individuals who had their bank account information exposed. Current and former students of the University of Nebraska campuses in Lincoln, Omaha, and Kearney were affected; as well as anyone who applied to the University since 1985.

UPDATE (06/01/2012): The Nebraska College System began using a shared student information system called NeSIS in 2009. This resulted in data from Chadron State, Peru State, and Wayne State colleges being exposed.

http://www.privacyrights.org/data-breach/new
UPDATE (09/10/2012): Police seized computers and related equipment belonging to a University of Nebraska-Lincoln (UNL) undergraduate student who is believed to be involved in the incident.

UPDATE (12/11/2012): The former UNL student has been charged with intentionally accessing a protected computer system and causing damage of at least $5,000.

May 18, 2012 University of Louisiana Monroe (ULM)
Monroe, Louisiana

EDU HACK
121 (No SSNs or financial information reported)

Anyone who participated in ULM’s Upward Bound program between 2009 and 2012 should check a special ULM website for information on the breach: [www.ulm.edu/breach](http://www.ulm.edu/trio/breach/).

A University of Louisiana Monroe employee's email account was hacked. The hacker or hackers could have accessed the sensitive information of people enrolled in the Upward Bound program. A file in the employee's email included the names, addresses, telephone numbers, and other personal information of 83 high school prospects for the Upward Bound program, two former ULM employees who worked within a related program, a current ULM employee working in a related program, and 35 post-secondary ULM students.

EDU  HACK

Anonymous

Hackers associating themselves with Anonymous claimed to have obtained the private information of University of Pittsburgh students and alumni. The hackers threatened to release the information publicly unless the University apologized to students, law enforcement, and professors. The University was involved in the arrest of several supporters of Anonymous. Student passwords, dorm information, payment and credit information, parent information, coursework and grades, as well as alumni information may be exposed.

UPDATE (08/28/2012): Two men were arrested for allegedly participating in a hack of University of Pittsburgh. One entered a plea of not guilty.

March 16, 2012  
**University of Tampa**  
Tampa, Florida  
EDU  DISC

A server management error caused files containing sensitive information to be made publicly accessible between July of 2011 and the breach's discovery on March 13, 2012. A classroom exercise revealed that the information was compromised and the University of Tampa's IT office was immediately informed of the discovery. The University of Tampa then notified Google and asked that the cached file be removed from the search engine.

One file included 6,818 records of students who attended in Fall of 2011. Two other files contained the information of an additional 29,540 people and included University ID numbers, names, Social Security numbers, and photos. Some people also had their dates of birth
exposed. The IT office at the University of Tampa concluded that the files had only been accessed by the people who reported the breach.

**UPDATE (3/22/2012):** Additionally, 22,722 current and former faculty, staff, and students who were associated with the University between January 29, 2000 and July 11, 2011 may have had their information exposed. The IT office confirmed that these files had only been accessed by University insiders as well. The University will not cover the cost of credit monitoring services for those who were affected.

San Francisco, California

EDU HACK Unknown

The College's electronic systems have been affected by a series of dangerous viruses since 1999. The problem was noticed in 2012 when the College's data security monitoring service detected an unusual pattern of computer traffic. Further investigation revealed that servers and desktops had been infected across administrative, instructional, and wireless networks. Officials believe that it is likely that using a flash drive to transmit information between a campus computer and a personal computer resulted in exposed personal information. It appears that the viruses searched and transmitted data to sites in Russia, China, and at least eight other countries. Banking information and any other personal information that may have been accessed by visitors, students, staff, and faculty on campus computers between 1999 and January of 2012 could have been exposed.

HACK  
176,567

Those with questions may call (855) 886-2931 or email responseteam@vcu.edu.

Hackers were able to access a Virginia Commonwealth University (VCU) computer server. It contained files with the personal information of current and former VCU and VCU Health System faculty, staff, students and affiliates. Suspicious files were discovered on the server on October 24. It was taken offline and subsequent investigation revealed that two unauthorized accounts had been created on a second server. While the first server did not contain personal data, the second server did and had been compromised through the first server. Data included either a name or eID, Social Security number, and in some cases, date of birth, contact information, and various programmatic or departmental information.
November 10, 2011  
**Wakulla County School Board**  
**Crawfordville, Florida**  
EDU  DISC  2,400

The information of 2,400 students in grades four through ten was accidentally posted online. A parent discovered the breach after searching their child's name. The student's FCAT scores and Social Security number appeared on a public site. The cause of the unintended disclosure was not reported.

November 2, 2011  
**University of Alabama**  
**Tuscaloosa, Alabama**  
EDU  DISC  Unknown

On October 26, students who had at least one failing midterm grade during the Fall 2011 semester received an email from the office of the assistant dean of students. The email, which informed students of their grade, was not blind copied. Each email recipient could see the email addresses of other students who received the email. No other information was exposed.

October 20, 2011  
**College of the Holy Cross**  
**Worcester, Massachusetts**  
EDU  UNKN  493

Seven Holy Cross employees fell for phishing attempts. The employees had their email accounts attacked and emails containing personal information for hundreds of people were exposed. Though Holy Cross has a policy of encrypting all emails that contain personal information, these emails were not encrypted. Those who could have been affected were notified that their Social Security numbers, driver's license numbers, dates of birth, financial information and other types of information were at risk.

October 10, 2011  
**University of Georgia (UGA)**  
**Athens, Georgia**  
EDU  DISC  18,931

A data file that contained employment information such as names, Social Security numbers, dates of birth, dates of employment, gender, race, home phone numbers, and addresses was accidentally placed on a publicly available web server. The information was available from 2008 until 2011. Faculty and staff who worked at UGA in 2002 were affected.

September 23, 2011  
**University of Texas San Antonio (UTSA)**  
**San Antonio, Texas**  
EDU  DISC  688 (No SSNs or financial information reported)

Students and prospective students who enrolled in or applied to courses in UTSA's Honors College may have had their information exposed. On August 2, a UTSA employee discovered that a system misconfiguration allowed unauthorized users to access names, dates of birth, addresses, phone numbers, email addresses, GPAs and other personal information of students and prospective students. Between
June 20 and August 2, Honors College users as well as all other UTSA employees with access to the online system could view student information.

September 1, 2011
Harvard University
Cambridge, Massachusetts

Harvard's switch to Google "@college" email accounts resulted in the potential compromise of some student emails. Fewer than ten students reported that emails from other students with similar names were forwarded to them. The problem occurred because the email system did not distinguish between the older "@fas" accounts and the newer "@college" accounts. For example, the system would forward emails from ctucker@fas.harvard.edu (mailto:ctucker@fas.harvard.edu) to the new address of ctucker@college.harvard.com (mailto:ctucker@college.harvard.com) even if the "@harvard" email had been taken by a different student. Students with "@harvard" emails also had their emails forwarded to other students' accounts.

June 24, 2011
Harrisburg Project, West Aurora School District, Kaneland School District
Palatine, Illinois
EDU PORT 10,000

The West Aurora school district headquarters is in Aurora, Illinois and the Kaneland school district is in Maple Park, Illinois. The theft occurred in Palatine, Illinois.

Two laptops were stolen from a car on or around June 7. The laptops were from an Illinois State Board of Education (ISBE) subcontractor called Harrisburg Project. The ISBE uses the Harrisburg Project as a subcontractor for special education reimbursement purposes. The laptops contained the personal information of over 10,000 students and staff from northern Illinois. Employees were using the laptops for training in data entry.

UPDATE (6/29/2011): It appears that both student and staff Social Security numbers were on the laptops. Additionally, student names, dates of birth, residential school district and other educational information were on the laptops. Staff names, demographics, teacher certification numbers and work assignments were on the laptops.

June 23, 2011
University of Central Missouri
Warrensburg, Missouri
EDU HACK Unknown

Two former students conspired to obtain and sell large databases of faculty and alumni information, change grades and steal funds from the accounts of other students. The two students developed malware that allowed them to capture passwords and gain unauthorized access to the University's network. The students were able to install the malware in a variety of ways. For example, the students obtained the information of other students by inserting a thumb drive into public PCs and personal laptops. Malware was installed on at least one University administrator's computer and the login credentials of a residence hall director were stolen.

One of the men pleaded guilty to charges of computer hacking conspiracy and computer intrusion. Charges are pending against the student's alleged accomplice.

St. Louis University (SLU)
St. Louis, Missouri
EDU PHYS Unknown

Someone noticed a pile of discarded paperwork and informed a local news station after it had not been removed within a week. Documents with the personal information of dozens of former St. Louis University students were exposed near a dumpster in a back alley. Most appeared to date back to the mid 1990's and correspond to library fines for late or lost books. An SLU security team picked up the papers after hearing about the incident.
June 11, 2011  Penn State Altoona  Altoona, Pennsylvania  

A virus infected a Penn State Altoona computer that contained the names, addresses and Social Security numbers of alumni, faculty and staff members. The virus appeared on the computer sometime during the spring semester and was discovered on March 15. Those who were affected were not notified until June because the full list of affected people and their contact information had to be obtained by investigators. Only alumni with identical Social Security numbers and student IDs were affected.

June 10, 2011  Ravenel Elementary School  Seneca, South Carolina  

A Memorial Day weekend office burglary resulted in the theft of two laptops and a flash drive. The flash drive may have contained student information. This potential exposure includes copies of Medicaid release forms with student names, parent names and Medicaid numbers.

June 8, 2011  University of Mary Washington (UMW)  Fredericksburg, Virginia  

Students with questions may call University officials at 540-654-1265 or 540-654-2246.

May 27, 2011  San Juan Unified School District  Carmichael, California  

A human resources employee of San Juan Unified uploaded sensitive employee information onto a flash drive. Somehow the information was uploaded onto a website when the employee used the flash drive to perform volunteer work at her church. An employee who Googled their own name discovered that they could also see their Social Security number and other sensitive information. The information was available for six months. San Juan Unified decided to ban flash drives as a result of the incident.

May 20, 2011  Excel Academy  Castroville, Texas  

A group of employees left Excel Academy and took student information with them to a rival organization. School district superintendents were solicited by the rival academy, Eagle Wings, and shown student information that Eagle Wings should not have possessed. Student names and Social Security numbers were exposed. Excel reported the incident and police launched an investigation. Excel has student information from 33 districts.

March 22, 2011  Laredo Independent School District  
Laredo, Texas  
EDU  PORT  24,903

A disk that contained the Social Security numbers of all students in the Laredo Independent School District was lost or stolen sometime prior to February of 2011.

UPDATE (4/7/2011): Between August 2010 and January 2011, CDs that were mailed to the Texas Education Agency (TEA) were lost. The CDs were unencrypted and contained student Social Security numbers, dates of birth and ethnicity. The CDs were sent to TEA so that identifying information could be removed and the information could be passed along to the University of Texas at Dallas Education Research Center. According to a TEA spokesperson, Laredo ISD’s data set is missing from a set of other district information that was sent. Though the TEA claims that only Laredo student information was exposed, the information of 164,406 students from eight Texas school districts was sent. The information on the unencrypted disks goes back 20 years. This information includes current and former students in the top 10% of their class who graduated between 1992-2010 from Crowley, Harlingen, Round Rock, Killeen, Richardson, Irving, Mansfield, and Grand Prairie school districts.

January 15, 2011  Omaha School Employees Retirement System  
Omaha, Nebraska  
EDU  HACK  4,300

A breach of Omaha School Employees Retirement System's website was discovered on December 21. The incident occurred because of an attempt to access administrator log-in information. The hacker or hackers may have obtained a database with names, Social Security numbers, dates of birth, years of service and beneficiary information of current and former Omaha Public Schools employees. The website was shut down within two hours of the discovery.

January 11, 2011  University of Connecticut, HuskyDirect.com  
Storrs, Connecticut  
EDU  HACK  18,059

Customers who used their credit cards on UConn's Huskydirect.com sports gear website may have had their personal information exposed in a data security breach. A hacker was able to access the Huskydirect.com customer database and may have viewed billing information with names, addresses, telephone numbers, credit card numbers, expiration dates, security codes and email addresses. The Huskydirect.com database is run by an outside vendor. People who made purchases offline are not at risk.

UPDATE (1/31/2011): Some people who were affected by the breach have recently reported fraudulent charges.

UPDATE (2/19/2011): Additional details reveal the exact number of names that were on the customer database, the fact that the perpetrator used an administrative password, and the fact that Fandotech, the company that was hosting and managing the site, was not following correct web security procedures.

October 29, 2010  University of Hawai'i West O'ahu (UHWO)  Pearl City, Hawaii  

EDU  DISC  40,101

Students from the University of Mānoa were also affected.

Unencrypted files that were placed on the faculty web server exposed student information. Student names, Social Security numbers, birth dates, addresses and academic information were placed on the server in December of 2009. Students who attended UHWO in Fall of 1994 or graduated between 1988 and 1993 were affected. A much larger number of students who attended the University of Hawai'i Mānoa between 1990 and 1998 were also affected. The files were removed on October 18 after a privacy group notified the University. The server was quickly removed from the network. The faculty member who accidentally placed the file on the server retired before the breach was discovered.

UPDATE (11/19/10): A former student is filing a class-action lawsuit on behalf of students affected by the University of Hawaii's multiple breaches. The man attended the Mānoa campus between 1990 and 1998 and claims that he was affected by the this breach and one that occurred in June of 2009. The names of four other people are attached to his Social Security number and his credit has been used in Georgia. Around 259,000 private records have been exposed by the University of Hawai'i since 2005.

UPDATE (1/27/2012): The University of Hawaii will provide two years of credit protection services and credit restoration services to settle a class-action lawsuit involving data breaches that affected nearly 100,000 students, faculty, alumni, and staff between 2009 and 2011. The settlement is still subject to court approval.

April 28, 2010  Montana Tech  Butte, Montana

A Montana Tech employee mistakenly included the personal information of former students in an e-mail message sent to faculty, staff and students last week. The e-mail was an invitation to watch students present their research projects. But the file that this year's information was taken from included the names, addresses, Social Security numbers and in some cases birth dates of students whose research projects were done from 1998 through 2005.

April 23, 2010  Chattanooga State  Chattanooga, Tennessee

Nearly two thousand students records from Chattanooga State are missing. The company hired to scan the documents, mishandled them. The school took the records to a company, United Imaging in Walker County, where the papers would be converted to computer discs. The school was contacted by individuals who said there was something awry going on at this scanning site. That's when the school found their records in disarray, and brought them back. The papers included students' names, Social Security numbers, addresses, phone numbers, some even contained high school transcripts. Chattanooga State went through each item, hand by hand, and found nearly 2000 missing documents from 2007.

September 25, 2009  University of North Carolina, Chapel Hill  Chapel Hill, North Carolina

EDU HACK  236,000
(163,000 SSNs estimated)

A hacker has infiltrated a computer server housing the personal data of 236,000 women enrolled in a UNC Chapel Hill research study. The Social Security numbers of 163,000 participants were among the information exposed. The data is part of the Carolina Mammography Registry, a 14-year-old project that compiles and analyzes mammography data submitted by radiologists across North Carolina.

UPDATE (10/6/10): A lead researcher at the University is fighting a demotion and pay cut that resulted from the data breach in the medical study she directs. It appears that the incident first occurred in 2007 and was not discovered until 2009. An attorney representing the researcher claims that his client is not at fault because the University knew that the program's computer system had security deficiencies in 2006. The University claims that the researcher acted negligently, but the attorney claims that the researcher was not alerted to the security flaws and there is no evidence that the researcher violated or ignored rules in obtaining patient information.

UPDATE (5/9/2011): The researcher and University reached a settlement. The researcher agreed to retire at the end of 2011 and will receive her full rank and salary until that time.

The University sent letters to 7,000 students, but the final number of affected individuals appears to be closer to 250

After two documents containing student personal information were stolen, it was discovered that a former University police officer and his wife were responsible. They used the names, Social Security numbers, and birth dates of students enrolled in 2005 and 2006 summer sessions. The thieves fraudulently opened bank accounts, received student loans, and applied for credit and debit cards. The losses total more than $30,000.

A stolen Cornell University computer has compromised the personal information of thousands of members of the University community. The computer contains the names and Social Security numbers of current and former students as well as current and former faculty and staff members.
June 12, 2009  Kirkwood Community College  
Cedar Rapids, Iowa

Someone took a storage device from a counselor's office in Iowa City. That device contained names and Social Security numbers for participants in the PROMISE JOBS program.

June 12, 2009  Oregon Health & Science University  
Portland, Oregon

A physician's laptop was stolen from a car parked at the doctor's home. Patient names, treatment dates, short medical treatment summaries and medical record numbers were stored on the computer. There were no home addresses, billing information or Social Security numbers stored on the laptop.

UPDATE (08/11/10): It seems that as many as 4,000 patients may have been affected and Social Security numbers were involved.

June 6, 2009  Ohio State Dining Services  
Columbus, Ohio

Student employees had their Social Security numbers accidentally leaked in an e-mail. The hiring coordinator for Dining Services, an OSU student, received an e-mail with an attachment that included students' names and SSNs. He accidentally sent the attachment in an e-mail reminding student employees to sign their waivers for the Ohio Employees Retirement System. After realizing the mistake, the hiring coordinator called the Office of Information Technology, which stopped the e-mails before all of them were sent.

June 5, 2009  Virginia Commonwealth University  
Richmond, Virginia

A desktop computer was stolen from a secured area within Cabell Library in mid-April. The computer may have contained student names, Social Security numbers and test scores dating from October 2005 to the present. VCU discontinued use of Social Security numbers as ID numbers in January 2007. An additional 22,500 students are being notified that their names and test scores may have also been on the computer. No Social Security numbers were recorded with those names, but computer-generated student ID numbers may have been.

June 1, 2009  University of Nevada - Las Vegas  
Las Vegas, Nevada

A UNLV computer was compromised and may have allowed loss of some personal data. The College of Sciences recently sent a letter to about 20 students as officials became aware of a virus affecting a computer in the College. The College found no information was leaked, but for legal reasons they still sent the letter.

April 1, 2006  
**Shorter College**  
Rome, Georgia

EDU  HACK  Unknown
A student was arrested for computer theft and hacking the College's computer network. The student may have accessed student, staff and faculty information.

**Information**
**Source:** Dataloss DB

**March 30, 2006**
**Connecticut Technical High School System**
**Middletown, Connecticut**

EDU  DISC  1,250

Social Security numbers of faculty and administrators were mistakenly distributed via email to staff. The email went to 17 principals; at least one forwarded the email to her staff of 77. Those affected were contacted.

**Information**
**Source:** Dataloss DB

**March 29, 2006**
**University of Nebraska Lincoln (UNL)**
**Lincoln, Nebraska**

EDU  DISC  342

Students from the College of Engineering had Social Security numbers, email addresses, grade point averages and other personal information posted online. The information may have been posted since November of 2004 and was first noticed in summer of 2005. The problem was finally fixed during the week of March 29 when the file was removed from the Google server.

December 8, 2005  San Antonio Independent School District  
San Antonio, Texas  
EDU  PORT  1,000

A laptop with personal information of more than a thousand teachers was stolen from an employee's unlocked car. The information included names, Social Security numbers and dates of birth.

December 8, 2005  J-Sargeant Reynolds Community College  
Richmond, Virginia  
EDU  DISC  26,000

The names, Social Security numbers and addresses of students taking non-credit classes from 2000 to 2003 were posted online for months. The information was compiled for a mailing list, but an employee posted it on the College's server. A student informed officials of the mistake after accessing the information online. The College began the process of removing the information from the web.

December 7, 2005  Idaho State University, Office of Institutional Research  
Pocatello, Idaho  
Contact: Information Technology Services (208) 282-2872, http://www.isu.edu/announcement/  
EDU  HACK  Unknown

ISU discovered a security breach in a server containing archival information about students, faculty, and staff, including names, Social Security numbers, birth dates, and grades. Anyone who was a student or employee between 1995 and 2005 could be affected.

December 2, 2005  Cornell University  
Ithaca, New York  
EDU  HACK  900

The University discovered a security breach last summer that exposed names, addresses, Social Security numbers, bank names and account numbers.

December 1, 2005  University of San Diego  
San Diego, California  
EDU  HACK  7,800

Hackers gained access to computers containing personal income tax data, including Social Security numbers, names, and addresses. Faculty members, students and vendors had their information compromised and were notified by the University.

November 23, 2005  University of Delaware  
Newark, Delaware  
EDU  HACK  952
Two separate departments were breached by hacking within a short period of time. A School of Education computer with the names and Social Security numbers of 772 students registered in online education courses was attacked in late August. A Department of English computer that had the Social Security numbers of 180 faculty, graduate assistant and other teaching staff from the department was also hacked in August. The larger breach appears to be the result of someone attempting to establish an illegal movie sharing system. The smaller breach was a possible attempt to log onto and control one server in order to gain control over servers of other campuses. Those affected received notification and Social Security numbers have been removed from both servers.

**Information**
